

1. **UNIT-I**

Introduction to Integration
Introduction to Integration Tools
Introduction to EAI, B2B, B2C
Overview of XML

2. **UNIT-II**

Overview
Introduction To webMethods
WebMethods Architecture
WebMethods Components
Runtime Components
Design Components
Administration and Monitoring Components
Installation Component
Deployment Component

3. **UNIT-III**

Introduction to web Methods developer Elements in Developer
Creating Packages, Folders, Java Service
Creating webServices
Creating Flatfile schema
Creating Flatfile Dictionary
Creating Flow Services
Creating IS Schemas, IS documents
Creating Client Code(C/C++,Java, VB)
Testing and Debugging Flow Services
Creating Adapter Connections (SAP,SQL Server, Oracle)

4. **UNIT-IV**

Broker Concepts
Creating Broker
Creating Broker Territory

Creating Broker Gateway
Working with Broker Documents
Publish and subscribe the documents
Creating Adapter Services
Creating Adapter Notifications
Usage Built-in Services
Converting XML Messages to Database Object

5. UNIT-V: Web Methods Integration Server Administration

Architecture
Restarting and Stopping the server
Creating Ports for https/ftp/file/polling/http
Managing Users and Groups
Publishing the Packages
Creating Scheduler Tasks

6. UNIT-VI: WebMethods Monitor

Monitoring the Services
Monitoring the Documents
Resubmitting the Services, documents

7. UNIT--VII: WebMethods Deployer

Deployment Steps
Creating Deployment Project
Define, Build, Mapping the Projects
Deploy the Project

8. UNIT-VIII: Web Methods Trading Network & Modeler

Introduction to web Methods Trading Networks
Introduction to webMethods Modeler

9. UNIT -IX: Advanced Topics

Introduction to web Methods BAM

Introduction to web Methods Fabrics 6.5
